

Question:1

Write a C program to print a simple student report card on the screen.

Programming Fundamentals Report Card

Marks obtained = 45

Total Marks = 50

Percentage = 93%

Grade = A.

```
1  #include<stdio.h>
2
3  int main()
4  {
5      int Marks_Obtained=45, Total_Marks=50, Percentage=93;
6      char Grade='A';
7      printf("Programming Fundamentals Report Card\n");
8      printf("Marks Obtained = %d",Marks_Obtained);
9      printf("\nTotal Marks = %d",Total_Marks);
10     printf("\nPercentage = %d %%",Percentage);
11     printf("\nGrade = %c",Grade);
12     return 0;
13 }
```

```
Programming Fundamentals Report Card
Marks Obtained = 45
Total Marks = 50
Percentage = 93 %
Grade = A
-----
Process exited after 0.04896 seconds with return value 0
Press any key to continue . . .
```

Question:2

Write a C Program to take input from user for a product. It should be Product Name, Price, Quantity, and then display the total cost (Price * Quantity).

```
#include<stdio.h>

int main()
{
    int Price, Quantity, Total_Cost;
    char Product_Name[20];
    printf("Enter Product Name:\t");
    scanf("%s",&Product_Name);
    printf("Enter Price:\t");
    scanf("%d",&Price);
    printf("Enter Quantity:\t");
    scanf("%d",&Quantity);
    Total_Cost=Price*Quantity;
    printf("Total Cost = %d",Total_Cost);
    return 0;
}
```

```
Enter Product Name:    Pencil
Enter Price:    10
Enter Quantity: 5
Total Cost = 50
-----
Process exited after 11.78 seconds with return value 0
Press any key to continue . . .
```

Question:3

Write a C program that asks the user for the radius of a circle and calculates its area and circumference.

(Use: $\text{Area} = \pi * r^2$, $\text{Circumference} = 2 * \pi * r$)

```
#include<stdio.h>

int main()
{
    float Radius, Area, Circumference;
    printf("Enter Area of Circle:\t");
    scanf("%f",&Radius);
    Area=3.1415*Radius*Radius;
    Circumference=2*3.1415*Radius;
    printf("Area of Circle is %f",Area);
    printf("\nCircumference of Circle is %f",Circumference);
    return 0;
}
```

```
Enter Area of Circle: 5
Area of Circle is 78.537498
Circumference of Circle is 31.415001
-----
Process exited after 4.533 seconds with return value 0
Press any key to continue . . .
```

Question:4

Write a C program that takes a user's daily budget and daily expenditure, then calculates and displays how much they saved or overspent for the day.

```
#include <stdio.h>

int main()
{
    float budget, expenditure, difference;
    printf("Enter your daily budget: \t");
    scanf("%f", &budget);
    printf("Enter your daily expenditure: \t");
    scanf("%f", &expenditure);
    difference = budget - expenditure;
    if (difference > 0) {
        printf("You saved %.2f today.\n", difference);
    }
    else if (difference < 0) {
        printf("You overspent %.2f today.\n", -difference);
    }
    else {
        printf("You spent exactly your budget today. No savings, no overspending.\n");
    }
    return 0;
}
```

```
Enter your daily budget:      1000
Enter your daily expenditure:  550
You saved 450.00 today.

-----
Process exited after 24.93 seconds with return value 0
Press any key to continue . . .
```

```
Enter your daily budget:      1000
Enter your daily expenditure: 1250
You overspent 250.00 today.

-----
Process exited after 10.48 seconds with return value 0
Press any key to continue . . .
```

```
Enter your daily budget:      1000
Enter your daily expenditure: 1000
You spent exactly your budget today. No savings, no overspending.

-----
Process exited after 4.995 seconds with return value 0
Press any key to continue . . .
```

Question:5

Write a C program to convert a user's height from centimeters to feet and inches.

(Note: 1 foot = 30.48 cm, 1 inch = 2.54 cm)

```
#include<stdio.h>

int main()
{
    float height, foot, inch;
    printf("Enter your Height in centimeters: \t");
    scanf("%f",&height);
    foot=height/30.48;
    inch=height/2.54;
    printf("Your Height in Foot is: %f",foot);
    printf("\nYour Height in Inches is : %f",inch);
    return 0;
}
```

```
Enter your Height in centimeters:      155.4
Your Height in Foot is: 5.098425
Your Height in Inches is : 61.181099
-----
Process exited after 3.502 seconds with return value 0
Press any key to continue . . .
```
